Ultimate Solutions, Inc. awards Bootbits, Inc. with contract to provide support for Abatron BDI tools and Freescale's MPC8536RDK

Tewksbury, MA and Montreal, QC– October 12, 2010 - Ultimate Solutions, Inc. announced today that Bootbits, Inc. has been awarded a contract to provide support for their line of Abatron BDI tools, as well as Freescale's MPC8536RDK. Bootbits has years of experience developing embedded platforms using open source tools in conjunction with Abatron's BDI probes. In addition, their extensive knowledge with PowerPC platforms from Freescale will prove to be a valuable resource to those who have come to rely on Ultimate Solutions for their professional grade development tools.

When asked about Bootbits' presence in the market, Product Manager, Peter Tympanick stated, "Although Bootbits as a company is not a well known entity, their in-house capabilities and attention to details is regarded as top notch. They also have superior communication skills and possess a great care attitude when dealing with our customers who rely on our technical support to keep their projects moving forward." Peter goes on to say, "a bonus to selecting Bootbits to assist us with technical support is their innate ability to provide additional design services that reach well beyond the scope of our support subscriptions we offer today."

Sinan Akman, Director of Software Development for Bootbits, stated "We are very pleased to be part of the support team for Abatron BDI tools and MPC8536RDK reference boards. We believe that our background and years of experience in helping customers with their board bring-up and embedded design needs, as well as building our own embedded platforms will provide a very important component in achieving high quality support that USI customers can rely on."

Sinan also added, "We see this as an exciting opportunity to gain visibility with companies actively engaged in embedded design work who can benefit from our additional embedded design services. Our involvement in offering support to USI customers will be an excellent way for Bootbits Inc. to broaden its exposure in the market."

About Ultimate Solutions, Inc.

Ultimate Solutions, a Massachusetts based company was founded in 1999 with a vision to provide developers of embedded systems with a single channel to procure a wide spectrum of professional grade development tools. USI's product lines target the most commonly used general purpose CPUs and programmable DSPs available in the market today. Over the years, USI has established itself as the leading supplier of development tools for the embedded Linux market. In 2007, the company developed and released the industries first Eclipse based debugger optimized for use with GDB and Abatron's BDI2000/3000 series of BDM/JTAG probes. In 2008, the company opened an office in Southern California to improve its sales and support for customers in the Pacific Time zone. In the years to follow, USI is committed to expanding its products and support services to meet the demands of tomorrow's embedded developers. About Bootbits, Inc.

Bootbits, Inc. was established in 1998 as a consulting firm to help leading telecom companies with their growing low level software development needs. In the ensuing years, Bootbits focused on providing design services on Linux and other open source solutions.

Bootbits now specializes in customized embedded solutions and provides complete product development based on open-source solutions. It also provides precise and high quality support from initial board bring-up and firmware design up to highly centralized web based network management interfaces.

Bootbits added value distinguishes itself in detailed analysis and understanding of customer needs. It sets an overall accuracy in providing very high quality products. Through partnership and collaboration with other software and hardware vendors, Bootbits ensures that customers receive the highest return on their investment and enables them to market their products within the shortest time while maintaining unprecedented quality.
